Overview

Capabilities:
The room is equipped with the following Sources available:

- PC w/TakeNote Software
- Laptop
- DVD
- VCR
- Document Camera
Control System - Touch Panel Logo Page:

- The touch panel will be blank when the system is powered down.
- To activate or turn the control panel on, simply touch the blank screen.
- The first page you will see will be the Welcome page.
- Touch the page to advance to the Main Source selection page. *(At this point the projectors will power up and the system will be temporarily disabled (30 to 60 seconds) while the system warms up.)*
Main Sources

- From this page you will have the following sources available:
  - PC
  - Laptop
  - DVD
  - VHS
  - Doc Cam
  - PC TakeNote

- Always present in the lower right corner of the page is the **System Off** button. Select this button to completely shut the system down.
When you select the **PC** button, the following screen will appear.

- There are no additional controls on the screen, use the PC to control the output.
- To control volume, if applicable, use the **Program Volume** Up/Down/Mute buttons to adjust the volume accordingly.
- To select another source simply select the source button from the left of this screen.
- Always present in the lower right corner of the page is the **System Off** button. Select this button to completely shut the system down.
**Laptop**

- When you select the **Laptops** button, the following screen will appear.
- There are no additional controls on the screen, use the **Laptop** to control the output.
- To control volume, if applicable, use the **Program Volume** Up/Down/Mute buttons to adjust the volume accordingly.
- To select another source simply select the source button from the left of this screen.
- Always present in the lower right corner of the page is the **System Off** button. Select this button to completely shut the system down.

**DVD:**

- When you select the **DVD** button, the following screen will appear.
- The buttons on this screen are a graphical representation of the buttons found on a typical DVD remote and act as such.
- Simply insert the Disc to be played and select the **Start** button.
- To go backwards in the current chapter, select the **Previous** button and so on.
- Once you have finished watching a video, select the **Stop** button, eject the DVD from the unit and then select another source.
- In addition you will see the **DVD Menu** button. Select this button to view the DVD’s menu options. Use the up/down, left/ right arrow buttons to navigate through the menu options.
- To control volume, if applicable, use the **Program Volume** Up/Down/Mute buttons to adjust the volume accordingly.
- To select another source simply select the source button from the left of this screen.
- Always present in the lower right corner of the page is the **System Off** button. Select this button to completely shut the system down.
VHS:

- When you select the VHS Play button from the menu, the following screen will appear.
- The buttons on this screen are a graphical representation of the buttons found on a typical VCR remote and act as such.
- Simply insert the tape to be played and select the ▶ button.
- To rewind, select the ◀ button and so on.
- Once you have finished watching a video, select the ■ button, eject the tape from the unit and then select another source.
- To control volume, if applicable, use the Program Volume Up/Down/Mute buttons to adjust the volume accordingly.
- To select another source simply select the source button from the left of this screen.
- Always present in the lower right corner of the page is the System Off button. Select this button to completely shut the system down.
**Doc Cam:**
- When you select the **Doc Cam** button from the menu, the following screen will appear.
- There are no additional controls on the screen, use the Document Camera to control the output.
- To select another source simply select the source button from the left of this screen.
- Always present in the lower right corner of the page is the **System Off** button. Select this button to completely shut the system down.
**PC TakeNote**

- When you select the **PC TakeNote** button, the following screen will appear.
- The TakeNote software resides on the PC and allows you to view the PC and make annotations directly onto the Touch Panel for display on the projector.
- In addition, you have the ability to save your annotations back to the PC as basically a screen shot of the display and annotation.
- The buttons on the lower portion of the screen are one touch buttons for basic screen/mouse commands.
- To return to the touch panel main pages, select the Exit button in the lower left corner of the screen.

![No connection image](image-url)
**Projector Controls**

- When you select the **Projector Controls** button, the following screen will appear.
- From here you have ability to manually power On/Off the Left and Right projector.
- In addition, you can mute the image output by selecting the Image Mute button.
  - *This button does not power down the projector. Be sure to completely shut the system down at the end of each session to ensure maximum lamp life.*
- To select another source simply select the source button from the left of this screen, or, to exit the Projector Controls and return to the previous screen, select the Exit button.
- Always present in the lower right corner of the page is the **System Off** button. Select this button to completely shut the system down.
**Powering Down The System:**

- As I have mentioned various times throughout this document, shut the system down by selecting the **System Off** button in the lower right corner of the screen.
- This will bring you to the Are You Sure confirmation page.
- Select **Yes** to complete this task. Select No if you wish to return to the Main Source screen.
