Viewing Originality Reports in TURNITIN

After you submit your paper through Moodle/Turnitin, it will be run through plagiarism detection software. If your instructor has the “Student Originality Report” setting enabled, you can see the results by following these instructions:

1. Click on the Turnitin Assignment to access the submission area.

2. Click on the “My Submissions” tab

3. To view professor comments, click on the percentage bar (‘Similarity’ column) to open a new window that contains your paper and originality report.

Your report will display the original paper on the left and a list of sources on the right. You can see in the example below that content from this paper was submitted to King’s College before and appears on other websites, too. When more than one suspicious passage of text is present, color coding helps identify the various sources. Click the source on the right to get more information about it.
